## Professional Summary

Blockchain Developer with hands-on experience in building smart contracts and dApps using Solidity, Hardhat, and EVM-compatible chains. Currently working on token launch platforms and DAO-based crowdfunding systems.

## Core Skills

Solidity, JavaScript, Python, Hardhat, Truffle, Web3.js, Ethers.js, React.js, Node.js

## Projects

### 0xDeVotes - Decentralized Voting dApp

Built a DAO-based voting platform with Solidity and Hardhat for transparent, on-chain governance.

### SeiFun - Token Launching Platform (In Progress)

Developing a no-code solution for launching tokens and creating marketplaces on SEI.

### FundFlow - DAO-based Crowdfunding

A decentralized crowdfunding platform for educational causes, built with Solidity.

## Experience

- Data Analytics Internship - IBM SkillsBuild
- Entrepreneurship Startup Sprint - IBM SkillsBuild

## Education

B.Tech in Computer Science, Redacted University (2022-2026)
